ATTENTION : La charge maximale est indiquée par support. Pour les supports de tablette et de barre de penderie, il faut donc multiplier par 2 la charge maximale et veiller à soustraire le poids de la tablette. Veillez à toujours répartir la charge de façon homogène sur l'ensemble des supports ou des tablettes.

ATTENTION: specified safe load per bracket. Multiply by two for clothes rail brackets and shelf brackets, then deduct shelf weight. Loads must always be evenly distributed.
